PROFESSIONAL SUMMARY

Data Solutions Architect with 10.5+ years of experience in architecting, modernizing, and delivering enterprise-scale data and analytics platforms within financial services. Strong expertise in enterprise data warehousing, ETL modernization, Data Lake architectures, reporting platform migrations, and AI-driven content intelligence systems. Proven ability to translate business requirements into scalable, secure, and high-performance solutions aligned with both Agile and Waterfall delivery models.

CORE COMPETENCIES

- Enterprise Data Architecture & Modern Data Platforms
- ETL/ELT Design – Ab Initio & Informatica
- Reporting Platform Migration – Tableau Cloud & Qlik Sense Cloud
- AI/NLP Pipelines-Pytorch,Langchain,huggingface,JAX, LLM based systems, RAG architectures,
- Python Automation, VBA & Unix Scripting for Process Optimization.
- Data Engineering, Delivery Governance, Project Management
- Agile & Waterfall Delivery Models

EXTENDED TOOLS & TECHNOLOGY EXPOSURE

- Gained hands-on exposure to Neo4j graph database for modeling data lineage, dependency mapping, and relationship-driven analytics use cases.
- Explored MicroStrategy and Tableau for enterprise reporting, dashboard design, and cloud-based analytics platform capabilities.
- Worked with GPT-based models in proof-of-concept scenarios for data interpretation, automation, and AI-assisted solution design.
- Analyzed and interpreted legacy SAS code as part of modernization initiatives, focusing on transformation logic extraction and migration strategies.
- Built foundational expertise in Snowflake and Databricks, including data warehousing concepts, Data Lake architecture, and scalable data processing patterns.
- Participated in solution demos, innovation pods, and pre-sales activities to evaluate emerging technologies and define practical enterprise use cases.
- Collaborated in rapid prototyping and PoC development to assess feasibility of modern data platforms and AI-driven solutions.

PROFESSIONAL EXPERIENCE

Technology Architect – Infosys Ltd | July 2025 – Present

- Architecting enterprise-scale data solutions for financial services clients.
- Defining target-state data platform architecture and modernization of roadmaps.
- Driving architectural governance, security alignment, and deployment strategy.
- Working with managerial and sales team for framing the overall estimations and commercials for proposals
- Leading cross-functional onshore and offshore teams across delivery lifecycles.

Technology Lead – Infosys Ltd | Jan 2022 – June 2025

- Led a team of 7+ engineers delivering complex ETL and data warehousing programs.
- Owned end-to-end lifecycle: requirement analysis, solution design, development, testing, and deployment.
- Managed delivery governance including resource planning, onboarding/offboarding, and capacity tracking.
- Handled monthly effort tracking and invoice validation aligned with project financials.
- Automated Excel-based tracking processes using VBA and Python, reducing manual effort and improving accuracy.
- Implemented automated reminder emails and defect tracking dashboards to improve SLA adherence.
- Collaborated with architects, security teams, and stakeholders for scalable solution delivery.
- Worked across hybrid delivery environments (Agile + Waterfall), participating in sprint planning and milestone reviews.
- Improved operational efficiency by ~30% through automation initiatives.

Technology Analyst – Infosys Ltd | Jul 2018 – Dec 2021

- Designed and implemented high-volume ETL workflows for banking datasets.
- Contributed to performance tuning and mentoring junior engineers.
- Collaborated in solution design discussions and implementation planning.

System Engineer → Senior System Engineer – Infosys Ltd | Oct 2015 – Jun 2018

- Developed and supported enterprise batch processing systems.
- Built foundational expertise in ETL, DBMS, and UNIX environments.

SOLUTION ARCHITECTURE & RFP ENGAGEMENTS

RFP - BI Modernization

- Contributed to RFP responses for enterprise analytics modernization initiatives.
- Architected reporting migration strategies: On-prem Tableau → Tableau Cloud; QlikView → Qlik Sense Cloud, Microstrategy to Power BI conversion
- Defined target cloud reporting architecture including connectivity, governance, and cost considerations.
- Developed Python-based proof-of-concept demos to simulate data ingestion and reporting workflows.
- Provided effort estimations, migration blueprints, and risk assessments.

RFP – SAS Modernization to Snowflake

- Designed enterprise-scale **SAS code remediation and modernization** architecture targeting migration to Snowflake.
- Built a proof-of-concept to parse and interpret legacy SAS code, extracting metadata, transformations, and dependencies.
- Modeled SAS program relationships in **Neo4j graph database** to create a **comprehensive lineage and dependency view** across systems.
- Enabled identification of **common transformation patterns and reusable components** using graph-based analysis.
- Leveraged **graph insights to drive decision-making** for optimized target-state data model design.
- Integrated **Agentic AI capabilities** to analyze lineage data and automatically **generate gold-layer data models**.
- Automated creation of **Transformation Mapping Documents (TMD)** from interpreted SAS logic.
- Accelerated **Snowflake code generation** using AI-assisted translation and standardized transformation patterns.
- Provided **end-to-end modernization blueprint**, including architecture, effort estimation, and migration strategy

M.TECH CAPSTONE PROJECT – AI-DRIVEN VIDEO CONTENT INTELLIGENCE

M.Tech (Data Science) – BITS Pilani

- Architected a multimodal AI pipeline transforming unstructured video lectures into structured, searchable datasets.

- Used OpenCV for video processing, Whisper for speech-to-text transcription, and GPT3.5 for contextual summarization.
- Implemented timestamp-aware semantic segmentation to generate dynamic Table of Contents.
- Enabled semantic search across indexed transcripts to improve content discoverability.
- Designed modular and scalable batch processing workflow.

EDUCATION

- M.Tech – Data Science (WILP), BITS Pilani
- B.E – Electrical & Electronics Engineering, Anna University

CERTIFICATIONS

- Infosys Certified Ab Initio Developer
- Infosys Certified Informatica Developer
- Certification in Data Science using Python & NLP
